About the Product

Alprazolam is a medication used to treat anxiety and panic disorders. It belongs to a class of medications known as benzodiazepines, which work by enhancing the effects of a neurotransmitter called GABA in the brain. This helps to reduce anxiety and promote relaxation.

Alprazolam is typically taken as needed for anxiety symptoms or on a regular schedule for panic

disorders. It is important to follow your healthcare provider's instructions when taking Alprazolam and to not exceed the recommended dosage.
